

## **BRECKENRIDGE**

### OUTLINE

**BRECKENRIDGE** is based on a high-level, classified meeting of top US government advisors which took place in the summer of 2002

June, 2002.

Eight months since the invasion of Afghanistan.

It has been decided that the United States will invade Iraq in 2003.

Sanctioned by the White House itself, a meeting of top government and military aides, the driving force behind the most powerful branches of the US government and armed forces, along with corporate America's most powerful lobbyists, convened in a remote area of Colorado to plan, conspire and strategise the post September 11<sup>th</sup> doctrine of the United States, in particular the then imminent invasion, occupation and regime change of Iraq.

The government aides represented a wide area – the White House, Pentagon, State Department, Treasury; the military advisors covered all branches of the armed forces; the lobbyists acted on behalf of the oil, energy, technology, pharmaceutical, reconstruction and media industries.

**Together, this powerful group formed a pact to redesign the future of a nation, and the world. Using the attacks of September 11<sup>th</sup> as a premise, they enforced a complete reversal in policy of the United States. They used the attacks to give the US government unlimited license – license to act unilaterally, license to sidestep the constitution, license to ignore the United Nations, International Law and the Geneva Convention, license to indiscriminately bomb, kill, torture and commit genocide in defence of a so-called “war on terror”. They gave license to reshape the world in their and their fellow conspirators’ image.**

**The conclusions and recommendations of this meeting were adopted as the national policy of the United States. Many continue to be policy to this day.**

**Using never-before-released documents, case files and silent witnesses, this is a reconstruction of the Breckenridge Conference, a gathering that has until now only been rumoured and fabled, but can finally be substantiated through this dramatic reconstruction.**

**It reveals an American regime hell-bent on an evangelical crusade to reshape the nation and the world.**
